

Posilok® Plus Mining Tooth System

NEW EXTENDED WEAR POINT SHAPE 112TKTVP

A

B

C

SITUATION

Mining customers in abrasive applications have typically used the Posilok 112KTVP point shape for shaving layered or stratified materials. This point shape has great penetration in high abrasion, low impact applications, but is not a hammerless system.

MODIFICATION

ESCO offers this style point in a Posilok Plus version, 112TKTVP. The new 112TKTVP point provides customers with the benefits of the Posilok point, but with the added benefit of a fully hammerless locking system for increased safety.

RESULT

The Posilok Plus point provides customers with the benefits of the Posilok point, with the added benefit of a completely hammerless system, making this a safer option.
